

FIDUNIO

User Guide — Addendum A

Wide screens: iPad and computer

Version 1.1.54a

Supplements the FIDUNIO 1.1.54a User Guide

Real screenshots taken on iPad, 24 September 2026

1. How FIDUNIO uses a wide screen

The main User Guide shows every screen in the **phone layout**. On an iPad, or in a computer browser window at least 700 points wide, FIDUNIO uses the extra width in two ways:

- **Messages and chats use two panels** — the conversation list stays on the left and the open chat fills the right (chapter 2).
- **Other screens use the full width** — New Message, Settings and Group Info cover the whole screen, but lay their content out in wider cards or two columns (chapters 3 to 5).

Everything works the same way as on a phone; only the arrangement changes. On a computer, make the browser window narrower than about 700 points and FIDUNIO switches to the phone layout.

These pages use **real screenshots** from an iPad. The orange numbered circles match the numbered notes under each picture.

2. Messages and chat (two panels)

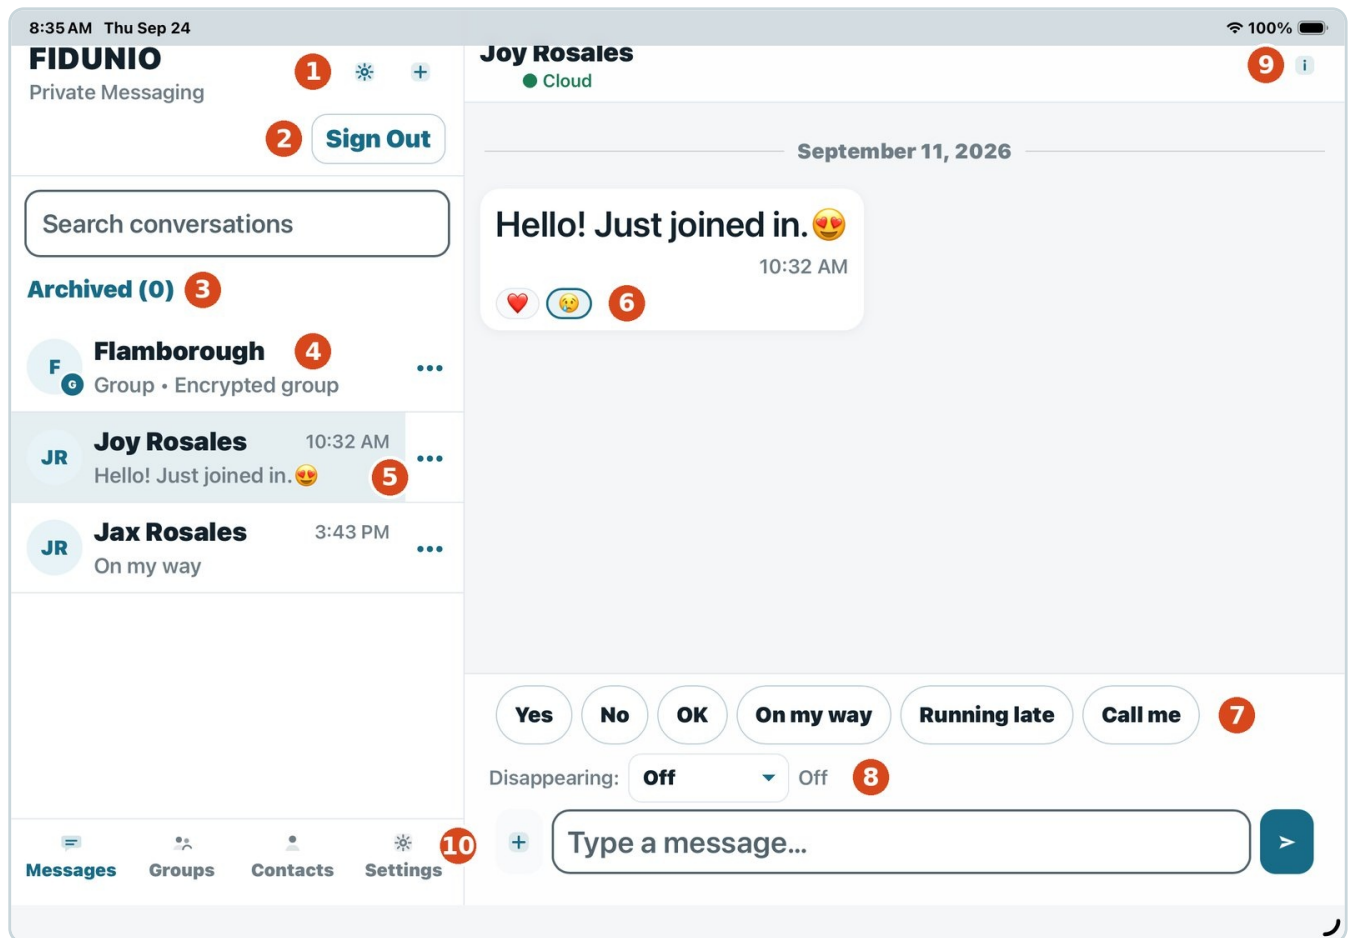

Figure A.1 — Messages list on the left, open chat on the right

- 1 **Settings** (gear) and **New conversation** (+).
- 2 **Sign Out** sits under the name on wide screens.
- 3 **Archived (0)** — tap to see archived conversations.
- 4 A group row: the avatar carries a small **G** badge and the preview reads **Group • Encrypted group**.
- 5 ••• — Conversation actions (Archive, Delete for Everyone). The open conversation is highlighted.
- 6 **Reactions** sit under the bubble. Your own reaction has a teal outline.
- 7 All six **quick replies** fit on one line.
- 8 **Disappearing** timer; the word after it repeats the current choice.
- 9 **Info (i)** — Chat Info, or Group Info for a group.
- 10 **Bottom bar**: Messages, Groups, Contacts (starts a new message) and Settings.

Tapping another conversation on the left changes only the right panel. There is no Back button needed on wide screens, because the list is always visible.

3. New Message (full width)

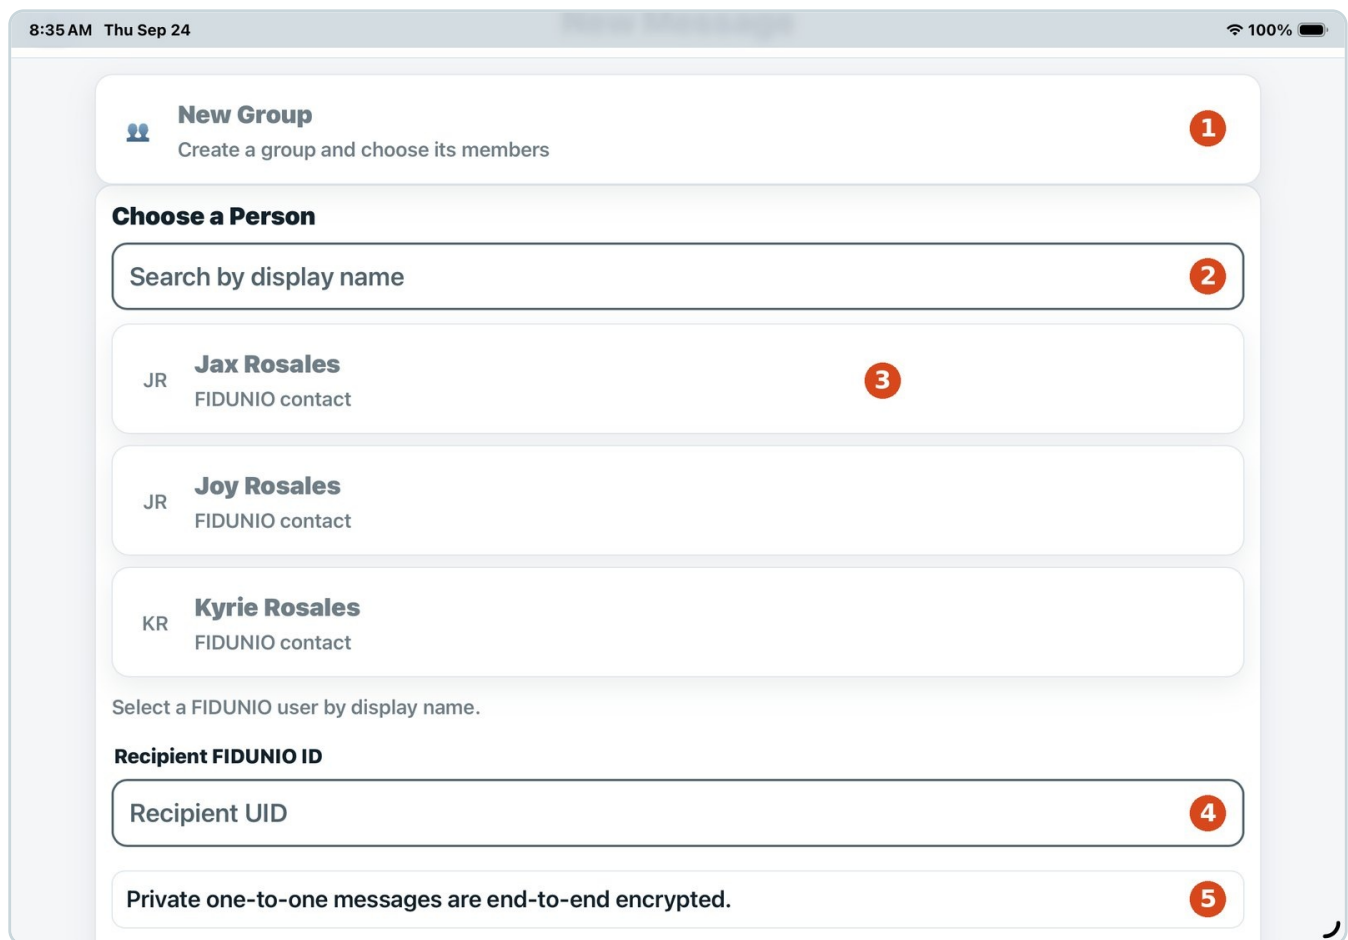

Figure A.2 — Choosing a person on iPad

- 1 **New Group** — create a group instead.
- 2 **Search by display name** — type part of a name to shorten the list.
- 3 Each person is shown with their initials and the label **FIDUNIO contact**. Tap one to choose them.
- 4 **Recipient FIDUNIO ID** — instead of choosing from the list, you can paste someone's FIDUNIO ID here. They find it in Settings → General → Account.
- 5 Reminder that one-to-one messages are end-to-end encrypted. Scroll down for the **Start Conversation** button.

4. Settings (full width)

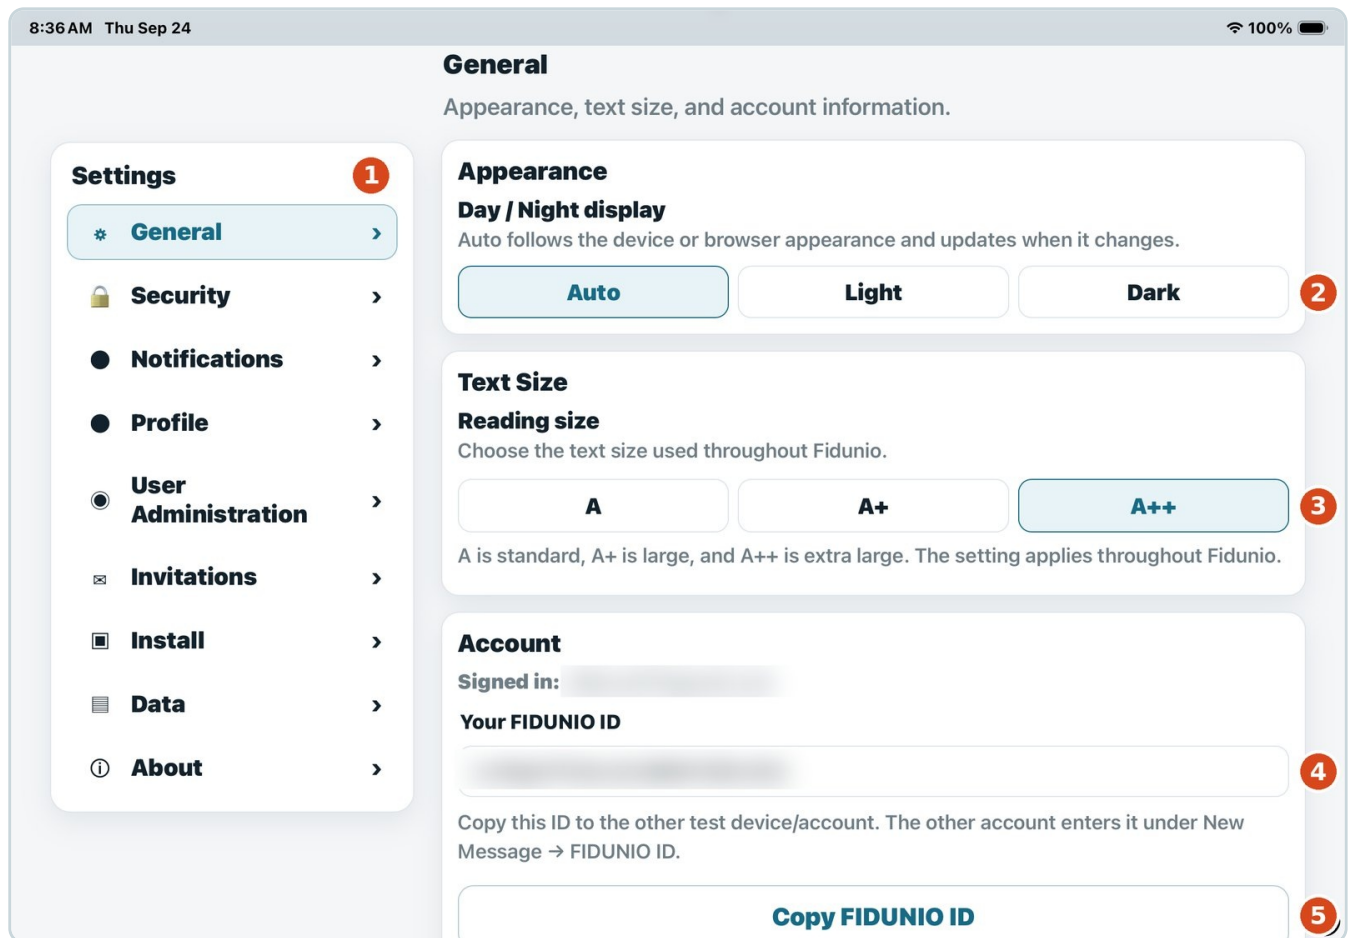

Figure A.3 — Settings with the section list on the left

- 1 The **section list** stays on the left. Tap a section to show it on the right.
- 2 **Appearance** — Auto, Light or Dark. The chosen button is outlined in teal.
- 3 **Text Size** — A, A+ or **A++** (extra large, selected here).
- 4 **Your FIDUNIO ID** — the ID another person can paste into New Message.
- 5 **Copy FIDUNIO ID** copies it so you can send it.

Correction to the main User Guide

Figure 16.1 in the User Guide listed Profile first. The real order of the Settings sections is:

General • Security • Notifications • Profile • User Administration • Invitations • Install • Data • About

5. Group Info (two columns)

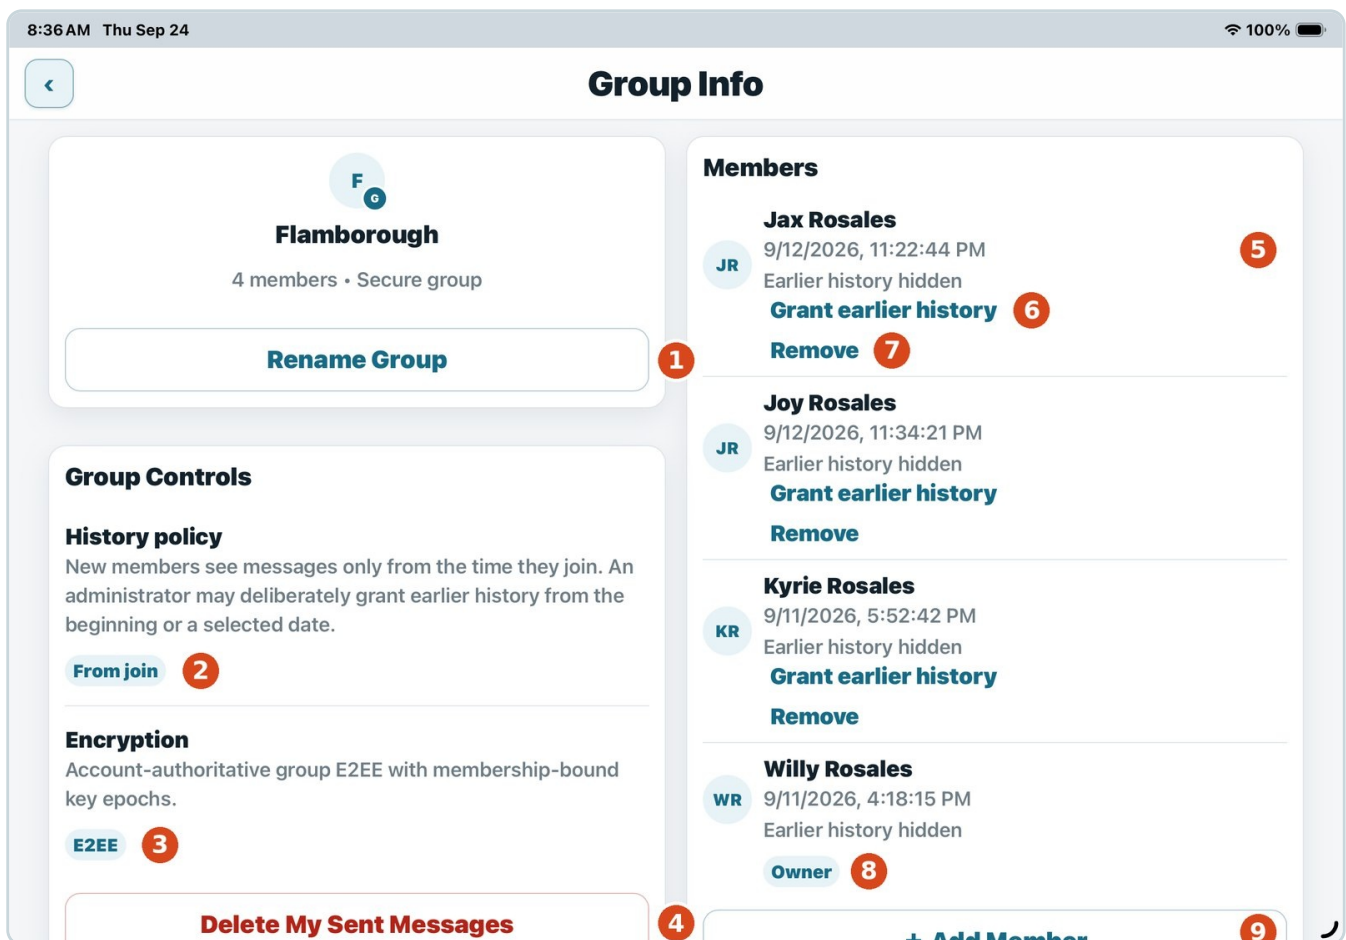

Figure A.4 — Group Info on iPad

- 1 **Rename Group** (administrators).
- 2 **History policy: From join** — new members see messages only from when they joined.
- 3 **Encryption: E2EE** — the group's key changes whenever members change.
- 4 **Delete My Sent Messages** — removes every message you sent in this group, for everyone.
- 5 Each member shows the **date and time they joined** and whether earlier history is hidden.
- 6 **Grant earlier history** — let this member see messages from before they joined.
- 7 **Remove** — take this member out of the group.
- 8 **Owner** tag — the owner cannot be removed.
- 9 **+ Add Member** — at the bottom of the members column.

On a phone these cards are stacked one above the other. On iPad the group summary and controls are on the left and the member list is on the right. **Grant earlier history** and **Remove** appear as text links under each member.

6. Screens not yet shown

Screenshots of these wide-screen views would complete this addendum:

- Groups list (bottom bar → Groups)
- Settings → Security, Notifications, Profile, Invitations, User Administration and Data
- A pop-up sheet, such as Message actions or Conversation actions
- Chat Info for a one-to-one chat
- FIDUNIO in a computer browser
