CUBEROOT · GOLF TOGETHER

The Marker Illustrated Quick Starter Guide

Your hole-by-hole golf companion.
With The Scorecard, or on its own.

Keep scores for one to four players. You can score yourself or have a caddie score from another phone. Sign in to post eligible rounds to The Scorecard, or play without an account and keep and share your card.

Instructions updated 29 October 2026: Caddie (0.7.1) and Follower (0.8.1) · Large-print edition. New Caddie and Follower screens use current version 0.8.3 source; earlier scoring screens are from 0.6.4.

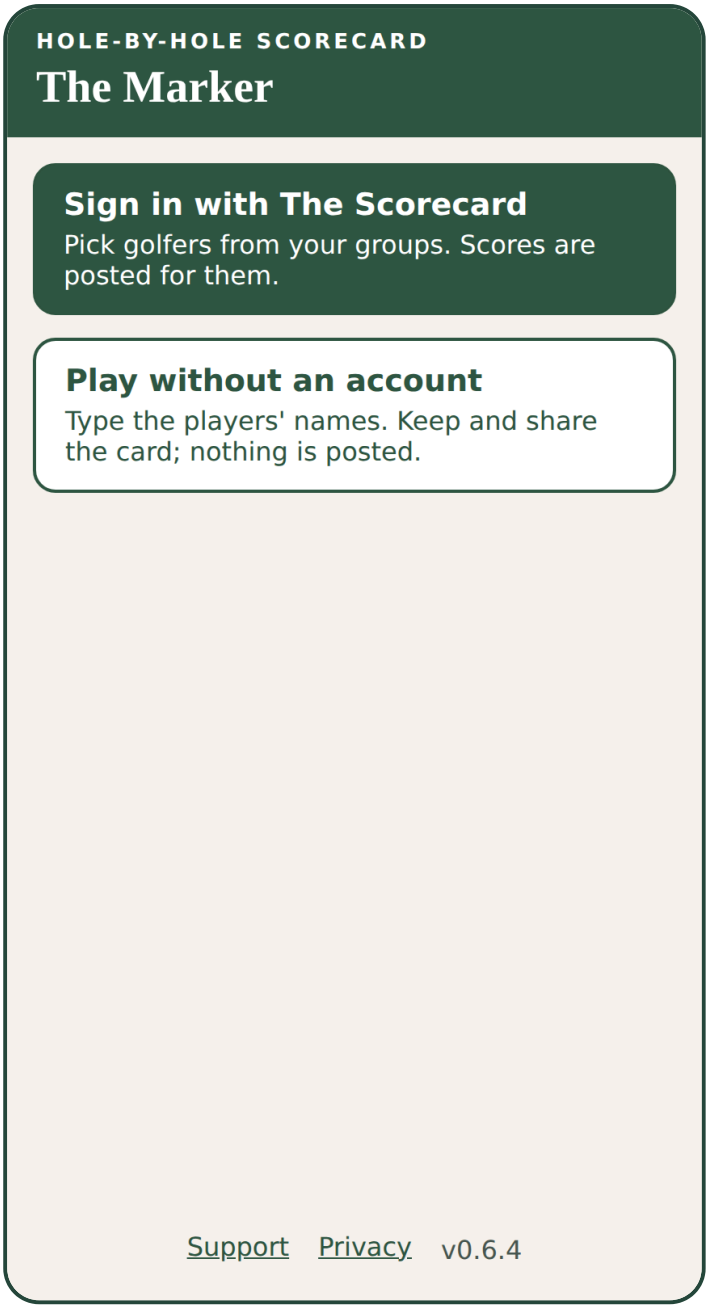

Open The Marker →

> The illustrations below use The Marker's actual screen markup and stylesheet, with fictional example names and scores. They are read-only examples, not screenshots from a personal account. Use the View this screen larger link for an expanded view.

1. Choose how to play
2. Set up the round
3. Choose the round date
4. Choose one to four players
5. Enter scores, one golfer at a time
6. Enter all players together
7. Finish, check and post or keep
8. Correct a posted card
9. Re-post after rounds were deleted
10. The Menu bubble during play
11. Share a card
12. Let a caddie score
13. Follow a card live

1. Choose how to play

The Marker is a companion to The Scorecard and a complete standalone scorecard for one to four players.

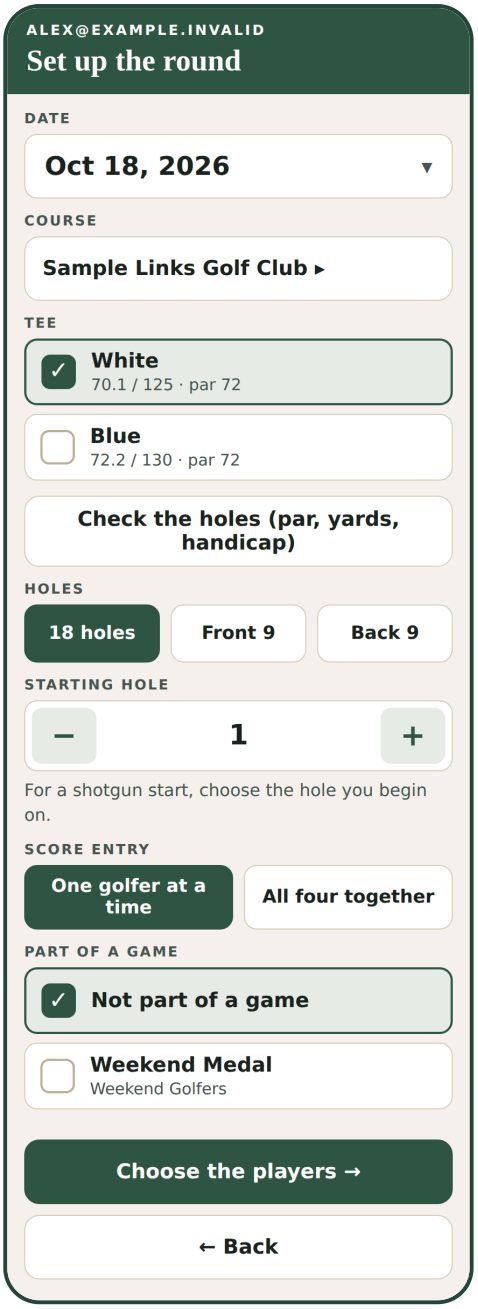

Source-matched illustration with fictional example data. **View this screen larger**.

1. Choose how to play: steps

1. Choose **Sign in with The Scorecard** to use your existing account and pick golfers from your groups. Eligible finished rounds can be posted for those golfers.
2. Choose **Play without an account** to type player names, keep the card on this device and share it. No Scorecard account is required.
3. **Continue your round** appears when a round is already saved. A saved correction or re-post instead shows **Continue your correction** or **Continue your re-post**. Open the web app while connected before leaving for the course.

2. Set up the round

Check these choices before you tee off.

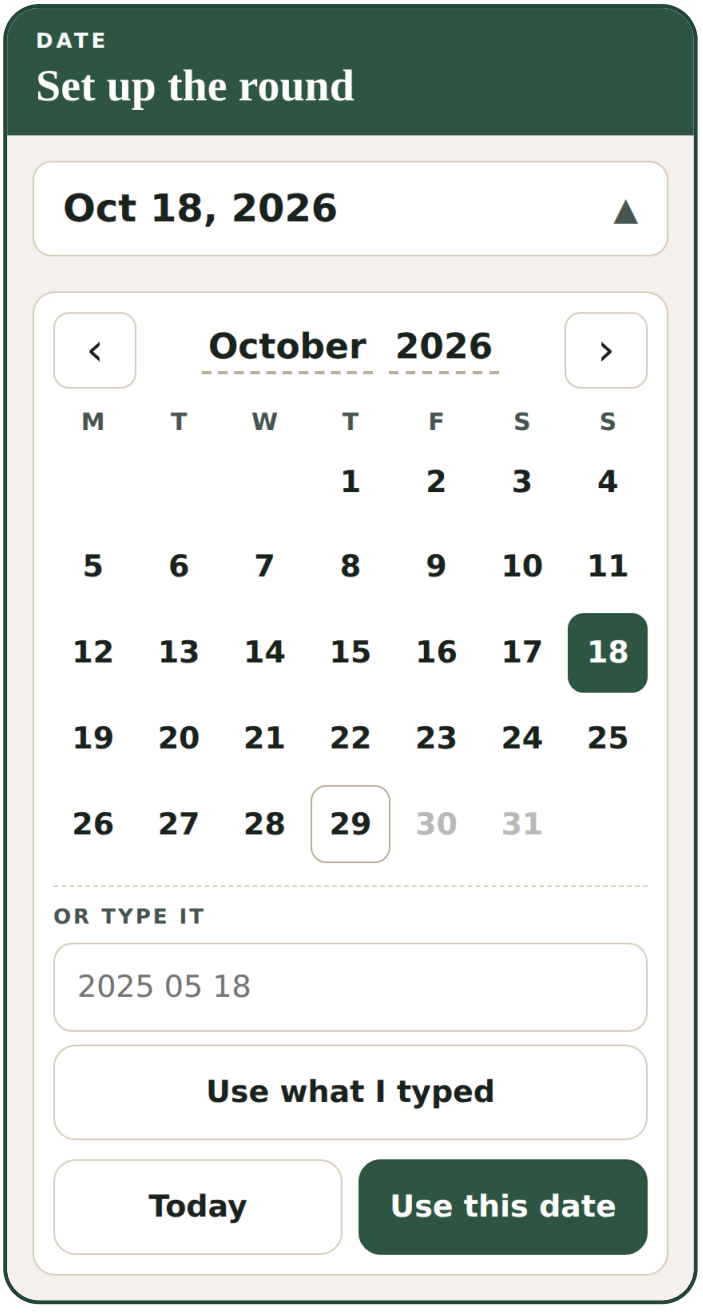

Source-matched illustration with fictional example data. **View this screen larger**.

2. Set up the round: steps

1. Tap the date to open the calendar. Select the month, year and day played, or type the date as year, month, day. Future dates are blocked. Choose the course and the tee actually used.
2. Choose **18 holes**, **Front 9** or **Back 9**. A nine-hole card can be shared but cannot be posted to The Scorecard.
3. Set the **Starting hole** for a shotgun start. An 18-hole round starting on 10 goes through 18, then 1 through 9.
4. Choose your score-entry layout. The selected course and tee apply to everyone on this card; use separate cards for different tees.
5. Need to add or photograph a course? Follow **Find and check a course** in the complete guide.

3. Choose the round date

Use the app’s calendar to select a past date or today.

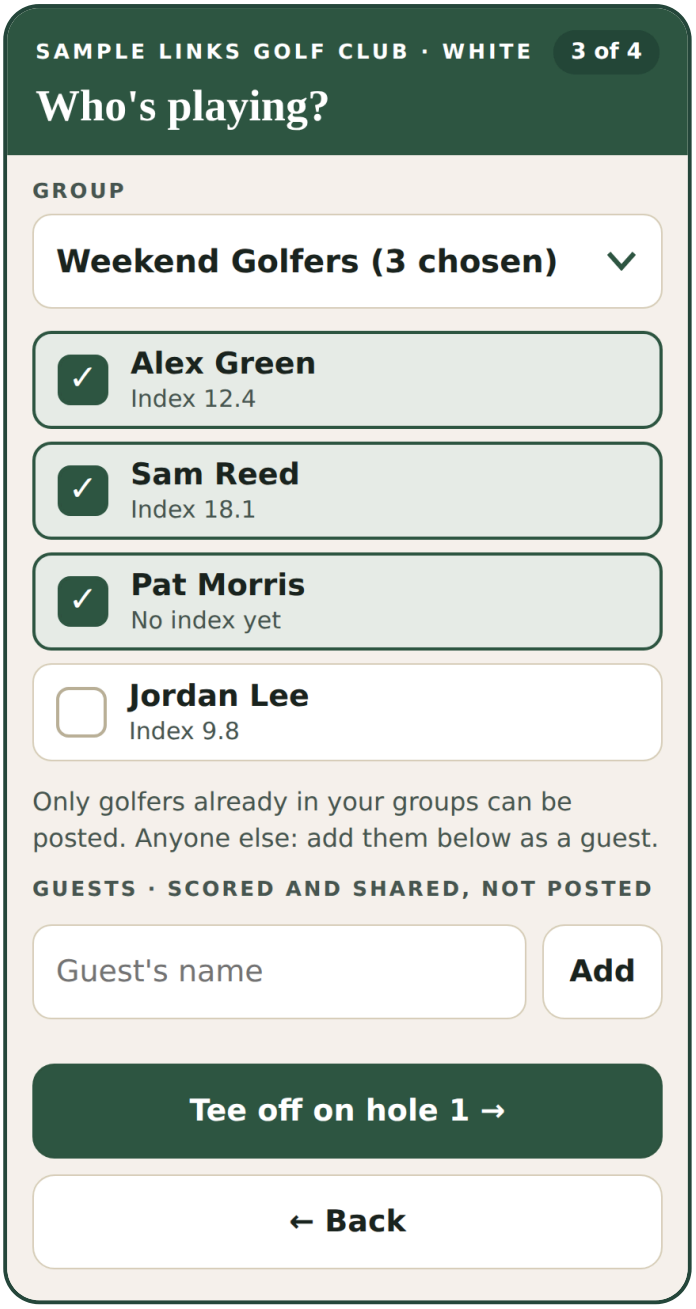

Current app screen with fictional data. **View this screen larger**.

3. Choose the round date: steps

1. Tap the date in **Set up the round** to open the calendar. Use the arrows for the previous or next month. Tap the month name or year to choose it directly.
2. Tap the day you played. The calendar closes with that date selected. Future days cannot be selected.
3. For another date, use **Or type it**: enter year, month, day, for example **2025 05 18** or **20250518**, then tap **Use what I typed**. Invalid or future dates show an error.
4. **Today** selects today. **Use this date** closes the calendar keeping the selected date. Changing the date clears the chosen game; check **Part of a game** again.

4. Choose one to four players

Group golfers can be posted; typed guests are scored and shared only.

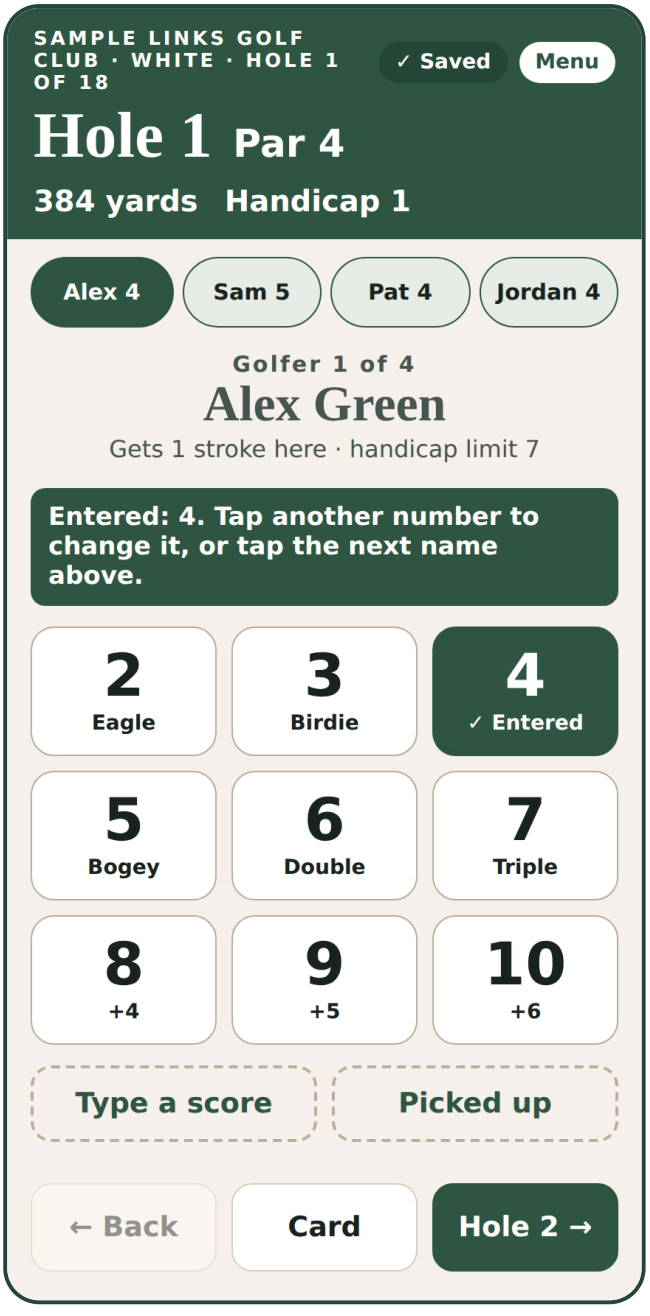

Source-matched illustration with fictional example data. **View this screen larger**.

4. Choose one to four players: steps

1. Tap **Choose the players**. Signed-in users select a group and tap existing golfers. You may select golfers from your own groups, up to four total.
2. Add other people by typing a name and tapping **Add**. Without an account, enter each player this way. Typed names are guests, even if they resemble a member’s name.
3. Tap a selected member again to deselect; use **Remove** for a typed player. Check the names, then tap **Tee off on hole …**.

5. Enter scores, one golfer at a time

Enter the strokes actually taken. The app calculates its handicap adjustment separately.

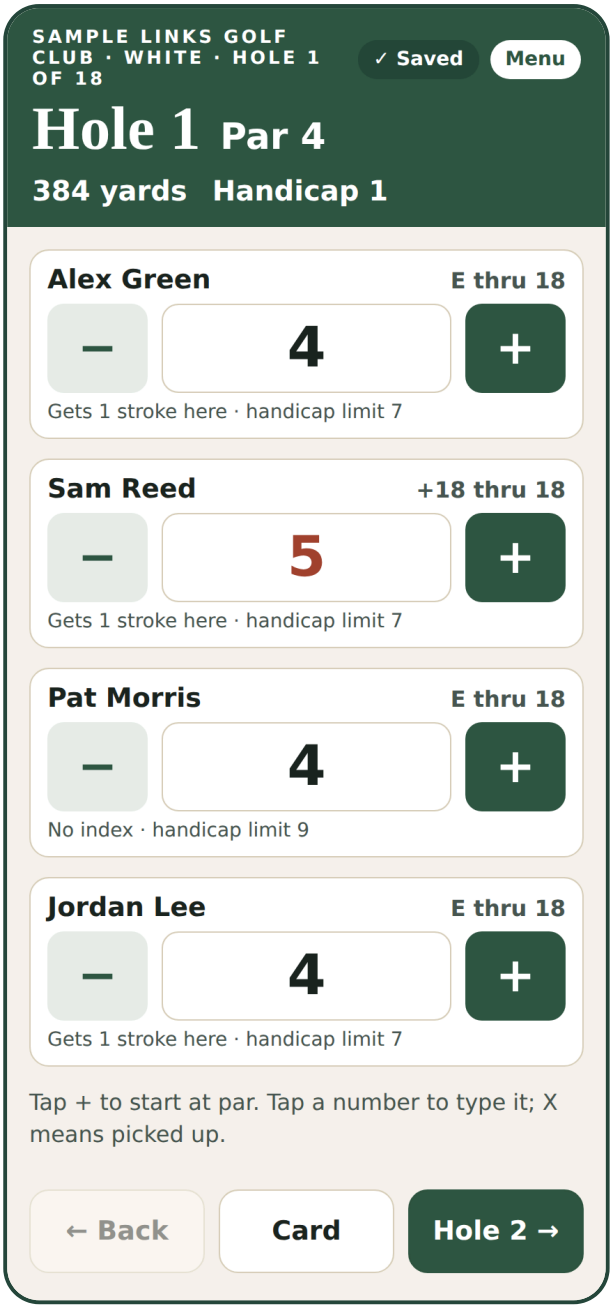

Source-matched illustration with fictional example data. **View this screen larger**.

5. Enter scores, one golfer at a time: steps

1. Tap the golfer’s name, then tap their score tile. The entered value is highlighted. Tap another value to correct it.
2. Tap the next golfer’s name and enter that score. Use **Type a score** for a whole number from 1 to 20.
3. Use **Picked up** when the player did not finish the hole. This records X; it is not a zero.
4. When everyone has an entry, tap the next-hole button. After the final hole, tap **Finish**. Watch for save errors before continuing.

6. Enter all players together

This is a different scoring layout, not a different game. It works for two, three or four golfers.

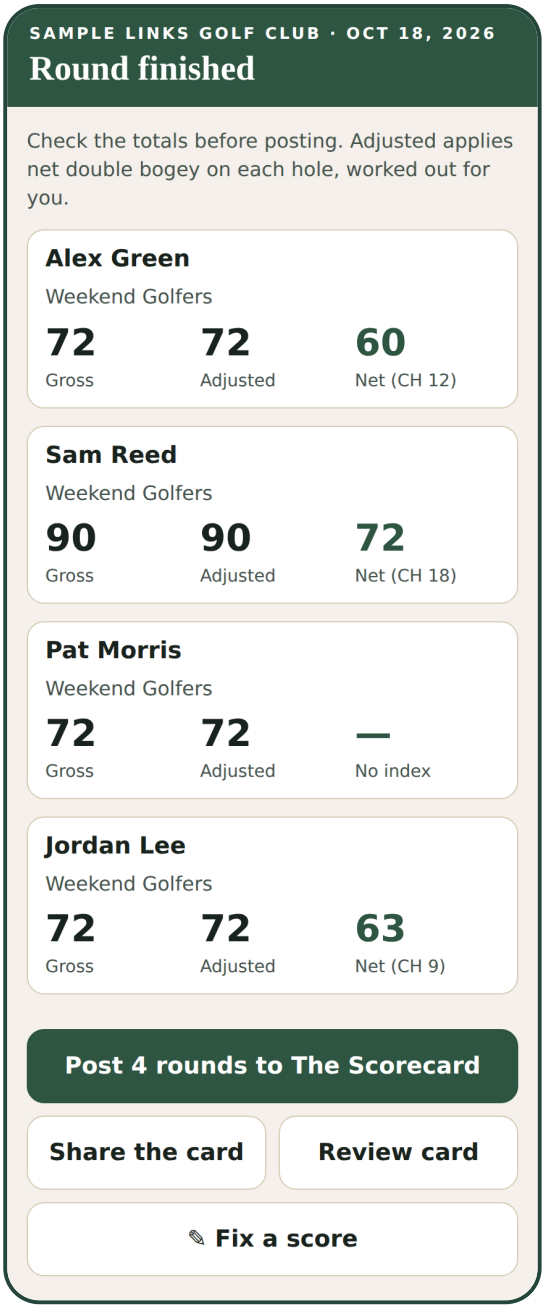

Source-matched illustration with fictional example data. **View this screen larger**.

6. Enter all players together: steps

1. During round setup, choose **All four together**. Or open **Menu → Switch to all four together** during play.
2. Each golfer has a separate score row. Tap **+** to begin at par; adjust with **−** or **+**, or tap the score to type 1–20.
3. Enter each player’s strokes on the same hole before moving on. A blank score is not a par.
4. To return to individual entry, tap **Menu → Switch to one golfer at a time**; existing scores remain intact.

7. Finish, check and post or keep

After the final hole, tap Finish and review the totals.

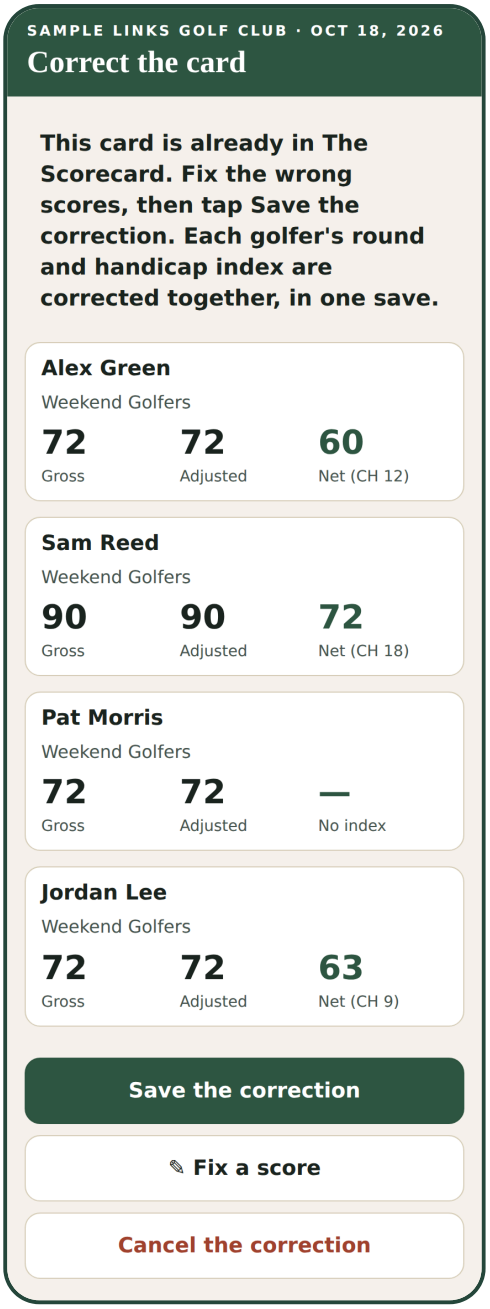

Source-matched illustration with fictional example data. **View this screen larger**.

7. Finish, check and post or keep: steps

1. Tap **Fix a score** or **Review card**, then tap the hole’s row. Change the score and tap **Done fixing — back to the totals**. Signed-in eligible 18-hole cards show **Post … rounds to The Scorecard**. Typed guests are not posted.
2. After posting, wait for **Posted** ✓. Waiting and Checking are not final confirmation. Reopen the app online to check delayed submissions.
3. Without an account, or for nine holes, choose **Share the card**, then **Done** to keep it under **Your cards**. If a signed-in round cannot be posted, read the displayed reason.
4. During play, use **Menu → Go to the start screen**, then **Continue your round** to return. Local cards stay in the same browser; do not clear its data.

8. Correct a posted card

The Marker can now correct hole scores on an eligible posted card. A connection is required.

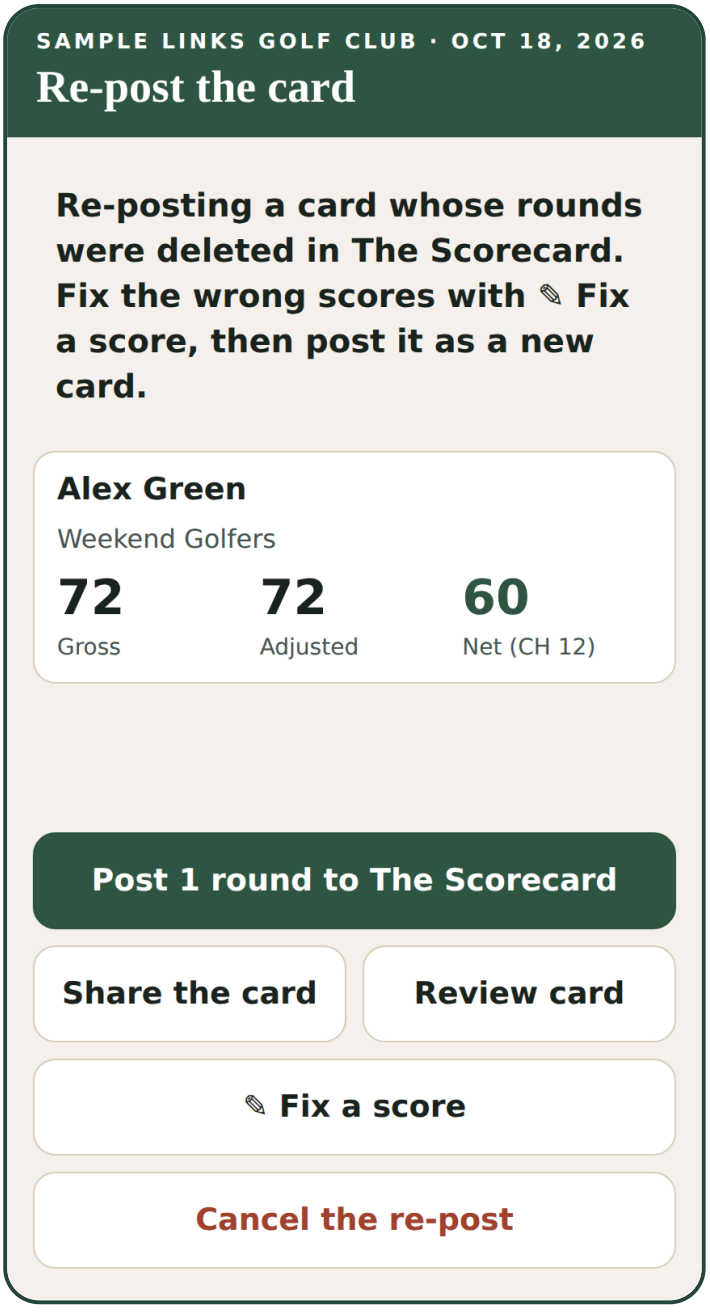

Current app screen with fictional data. **View this screen larger**.

8. Correct a posted card: steps

1. Sign in and open **Your cards → Correct a posted card**, then select a card. You can also open a posted card saved on this device and tap **Correct this card**. Finish or end another active round first.
2. The original scorer can correct the card for **24 hours after posting**. An owner or admin of **every group represented on the card** can correct it at any time. The service checks your access.
3. Tap **Fix a score**, tap the hole’s row, choose the golfer and change the strokes. Tap **Done fixing — back to the totals** to return directly. Repeat for other errors.
4. Review the totals and tap **Save the correction**. Wait for **Corrected in The Scorecard**. The affected rounds and handicap indexes are updated together. If no score changed, the app says nothing was saved.
5. A correction changes hole scores only. It keeps the original players, date, course, tee and game. If someone has changed a round directly in Scorecard, read the refusal and ask an owner/admin to resolve it there.
6. **Cancel the correction** discards the current correction after confirmation. Menu offers the same cancel action while correcting. If the connection fails, keep the screen and try again online.

9. Re-post after rounds were deleted

Use Re-post only for the cards the app identifies under Deleted in The Scorecard.

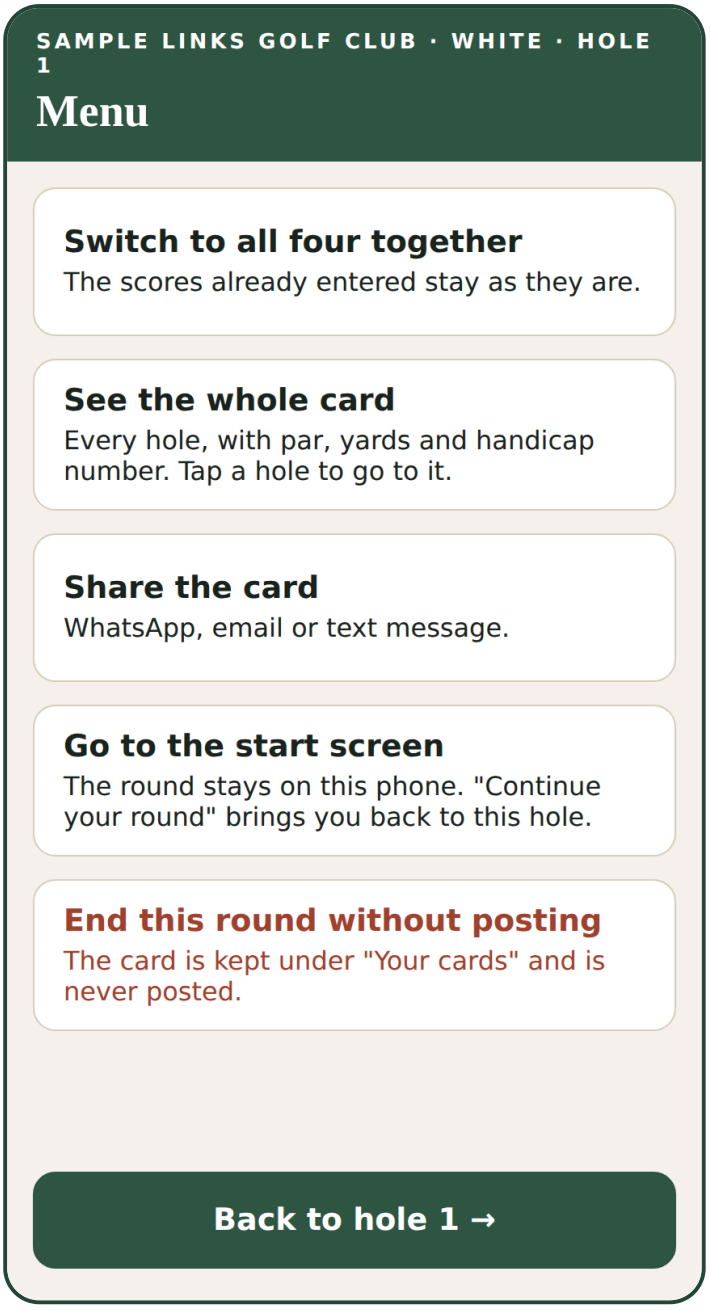

Current app screen with fictional data. **View this screen larger**.

9. Re-post after rounds were deleted: steps

1. Open **Your cards**. Under **Deleted in The Scorecard**, the app names the golfers whose rounds were deleted. Tap **Re-post**. Opening a saved original card may instead offer **Edit and re-post**.
2. The scorer, or an owner/admin of every group on the original card, may re-post. Finish or end another active round first. Only golfers with deleted rounds are put on the new card; surviving rounds are kept.
3. Use **Fix a score**, select the hole, change the strokes, then tap **Done fixing — back to the totals**. Check the date, golfers and totals shown.
4. Tap **Post … rounds to The Scorecard**. This creates a new card for the deleted rounds. Wait for **Posted ✓**. Once accepted, the new card replaces the original copy in this device’s card history.
5. **Hide** takes the deleted-round reminder off that list after confirmation; it changes no Scorecard round. If the original card remains on this device, opening it still offers **Edit and re-post**.
6. **Cancel the re-post** discards the current re-post without sending it. If the service says a round still exists or the card was already re-posted, check the current records before proceeding.

10. The Menu bubble during play

The **Menu** control appears at the top of the hole screen beside the saved indicator. Tap it without leaving your round.

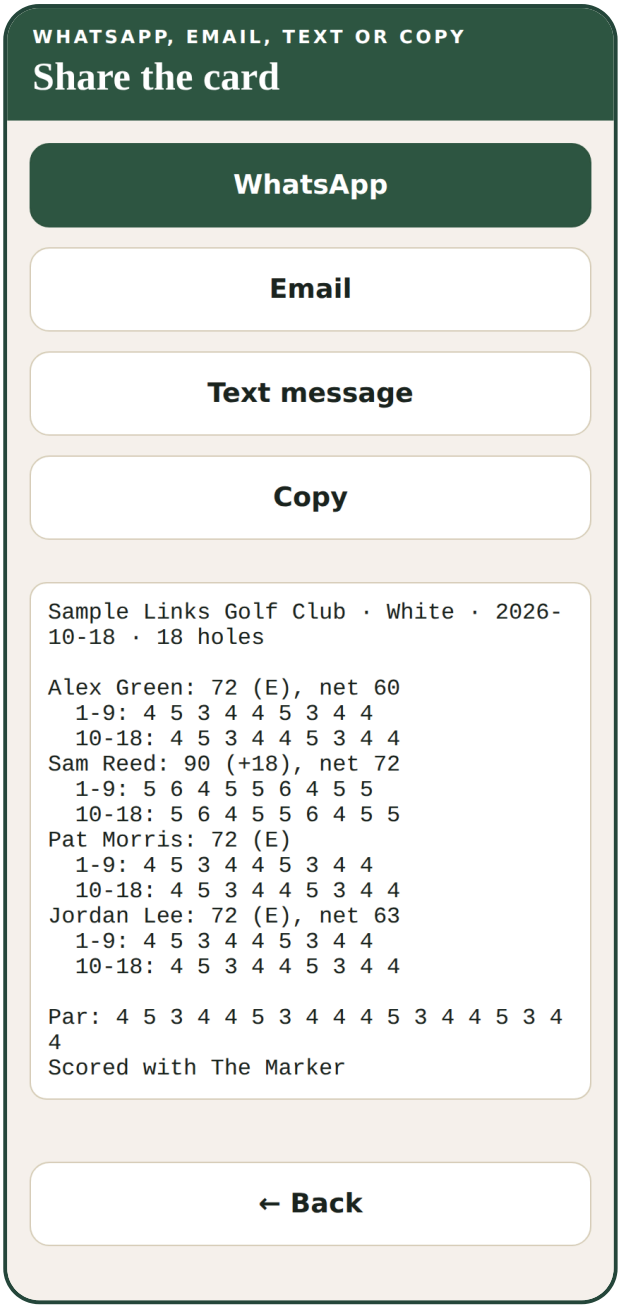

Source-matched illustration with fictional example data. **View this screen larger**.

10. The Menu bubble during play: steps

1. Tap **Menu** at the top right while entering scores.
2. Choose **Switch** to change the score-entry view. Your entered scores stay saved.
3. **See the whole card** lets you review holes; **Share the card** sends a score summary. **Let others follow this card** shows a QR link or code for live, read-only viewing.
4. **Go to the start screen** keeps the active round for **Continue your round**. **End this round without posting** is different: it ends the round and keeps a historical card without posting.
5. While correcting a posted card, **Cancel the correction** replaces End this round without posting. It abandons the correction after confirmation. Tap **Back to hole** to return to scoring.

11. Share a card

Share during play, after finishing or from Your cards.

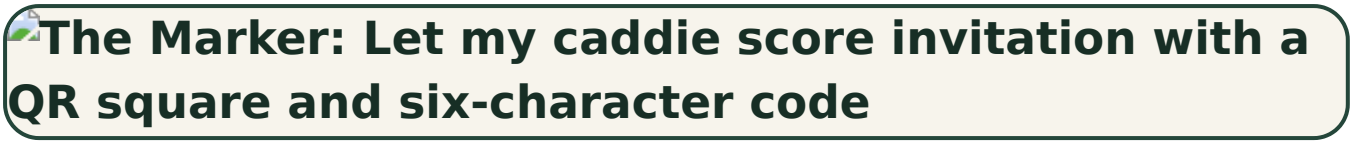

Source-matched illustration with fictional example data. **View this screen larger**.

11. Share a card: steps

1. Tap **Share the card**. Your device may show its native share sheet; otherwise choose WhatsApp, Email, Text message or Copy.
2. Choose the recipients in your messaging app and send when ready. Sharing sends a text summary with hole scores; it does not post rounds to The Scorecard.
3. If Copy is blocked, press and hold the displayed text and copy it manually. An unfinished card can also be shared; missing holes appear as dashes.

12. Let a caddie score

The golfer keeps control of the card while a caddie enters hole scores on another phone. The caddie does not need an account.

Screen rendered from The Marker 0.8.3 source code using fictional names and scores; the illustrated code cannot be used to join a real card. **View this screen larger**.

On the golfer's phone

1. Sign in, set up the round, and choose the players. Tap **Let my caddie score** before teeing off.
2. Show the caddie the six-character code or QR square. Keep The Marker available to see scores arrive.

Screen rendered from The Marker 0.8.3 source code using fictional names and scores; the illustrated code cannot be used to join a real card. **View this screen larger**.

On the caddie's phone

1. Open The Marker without signing in and tap **Caddie** at the bottom. Type the code and tap **Join the card**. Or scan the QR square using the phone's camera; the Join screen opens with the code filled in.

2. Enter scores for each hole. When finished, tap **Hand the card back to the golfer**.

Back with the golfer: Review and correct the received scores. The golfer—not the caddie—posts eligible 18-hole member rounds to The Scorecard. The golfer can take over scoring at any time. Only one caddie may join a card; the code expires on take-over, completion, or after 12 hours. Both phones need an internet connection to exchange scores.

See **the complete caddie instructions** for weak-signal recovery and access limitations.

13. Follow a card live

A golfer playing on the card can watch the scores on their own phone as the round progresses. This is **read-only**: a Follower can watch but cannot enter, correct or post scores.

The Marker: Let others follow invitation with separate QR and six-character follow code

Screen rendered from The Marker 0.8.3 source code using fictional names and scores; the illustrated code cannot be used to join a real card. **View this screen larger**.

Golfer who owns the card

1. Sign in and start the round. During play, open **Menu → Let others follow this card**. If a caddie is scoring, use **Let others follow this card** on the caddie-status screen.
2. Show the six-character follow code or the QR square to the golfers who want to watch.

The Marker: read-only Following scorecard with Stop following button

Screen rendered from The Marker 0.8.3 source code using fictional names and scores; the illustrated code cannot be used to join a real card. **View this screen larger**.

Follower's phone

1. Open The Marker and tap **Follow** at the bottom of the start screen. Type the code and tap **Follow the card**. Or

scan the QR square with the camera; it opens The Marker using the link.

2. See the golfers' hole scores and totals as they come in. The screen refreshes itself about every 12 seconds while open; no Scorecard account is required.
3. Tap **Stop following** to leave. The start screen can also offer **Follow: [course]** to resume.

Important: Anyone given the follow code can read the card, even if they are not a listed golfer. Share it only with people who should see the scores. The code expires after 12 hours; a finished card can still be viewed until expiry. A weak signal may delay updates.

See the **Complete User Guide's Follower chapter** for details.
